

**WE KNOW
MACS**

Our Experience

We have been supplying computers, accessories, software and support services to businesses of all sizes since 1983 – so not only do we have years of expertise and experience but, as an Apple Authorised Reseller, we showcase the latest Apple products.

From MacBooks and Mac Pros to iMacs and iPods, we have a great range for business and pleasure.

MR Systems' convenient location and combination of help-desk and on-site engineers make it the place to come for computer support, expert advice or to test-drive the latest Apple products.

If you're switching from PC to Mac we'll guide you through the transition and ensure you are left feeling confident about the best change you'll ever make.

Our services also extend to full networking solutions for your home or office as well as providing repairs or fit-outs for a new business.

You can buy online at www.mrsystems.co.uk or pop in to our shop in Islington, where our friendly team will always be happy to help.

"The level of personal service and support provided by MR Systems is outstanding. They're, without question, the first port of call for all our IT hardware requirements. Response and delivery to our requests are first class."

Jonathan Gibson - Director, OJO Images Ltd

WHY CHOOSE MAC

There are endless reasons why you'll love a Mac. It doesn't just look good - Macs are built with the world's most advanced operating system and a suite of software that's just as brilliantly designed as the computer itself. They are fully integrated, secure, powerful and easy to use, so, unlike other computers, your Mac is much more than just a piece of equipment.

Whether you're thinking of a Mac at Home or a Mac at Work there are great benefits for everyone:

▶ Advanced performance

Macs are built with the latest Intel processors, making them fast, responsive and able to produce outstanding performance levels.

▶ Cost effective

Macs are priced comparably to PCs and customers tell us that Macs last longer, require less technical support and, in the long run, are more cost effective.

▶ Extremely compatible

You don't have to worry about compatibility as most popular applications for Mac and PC use the same file formats, so you can still run Windows' operating system. USB, FireWire and Bluetooth are also built into every Mac.

▶ Safe environment

Apple is constantly working to minimise its impact on the environment. A Mac is now made from recyclable materials and the MacBook family is designed to be more energy efficient.

▶ Need to know more?

Call one of our dedicated sales account managers on 020 7697 2230 or visit www.mrsystems.co.uk

Apple's award-winning Mac OS X software comes with every new Mac!

POWER

at your fingertips

If you're searching for power, look no further than the Mac Pro. With 8-core or quad-core processing power, an integrated memory controller and built with an Intel Xeon "Nehalem" processor – it's no wonder the Mac Pro is Apple's most advanced professional workstation.

- Turbo Boost up to 3.33GHz
- 8 MB of fully shared L3 cache per processor
- Hyper-Threading for up to 16 virtual cores
- Fully customisable with an innovative enclosure that supports future expansion

Complete your Mac Pro with a 24-inch Apple LED Cinema Display or 30-inch Apple Cinema HD Display.

Extend the service and support of our Mac Pro with our advanced AppleCare Protection plan.

▶ **Pop in to our MR Systems showroom and test-drive a Mac Pro today!**

Beauty

inside and out

Remarkably thin and light but beautifully streamlined and extremely durable, MacBooks are perfect in every way.

With the next generation 802.11n Wi-Fi built into every MacBook, you can access the internet, share files and connect to wireless peripherals.

MacBook

From one solid piece of aluminium comes a MacBook that's thinner, more powerful and more advanced in so many ways.

13-inch

- Precision aluminium unibody enclosure, which makes it not only look stunning but also thinner, lighter and greener
- With a new NVIDIA GeForce 9400M processor, the new MacBook delivers an exceptional graphics performance

MacBook Pro

Up to 8 hours battery life and precision engineered down to the smallest detail

15-inch

- High-resolution LED-backlit widescreen display for top quality colour & brightness
- The redesigned trackpack gives you 39% more room to move

17-inch

- The ultimate mobile creative studio, with up to 8 hours of battery life on a single charge
- Reach a new level of high-speed, high-end game-playing power and advanced performance for graphics-intensive applications

MacBook Air

Ultra-thin, ultra-portable and up to four times faster than previous generation MacBooks, the MacBook Air is much more than just the thinnest notebook in the world

13-inch

- LED-backlit widescreen display provides a crisp picture with instant full brightness while consuming minimal power

- Work seamlessly with large files & multiple open applications

Which Mac are you?
